Coursera / 2022  
Course completed on 2022 provided by meta through Coursera platform

## PROJECTS

- Bloggy**  
Bloggy is a blog web app developed in MERN stack. It contains user login and register logic where user can write and post blogs.
- PokeDex**  
It is a pokemon info web app containing all important info about the pokemons. I have used Redux Toolkit to manage the state and async actions.
- Blog And College Note Api**  
It is an api made using Node and Express, possible to handel CRUD operation for blog, notes and important news and subjects. Basically its a College Class management Api.
- AudioPhile**  
Audiophile is design to code project, consisting fully functional backend created using Node js. User can fetch and do normal CRUD operations through the API.
